

PhD seminars

Computational Cell Biology group, division MeBioS, department Biosystems

all seminars take place in room SEG.01.0019, Willem de Croylaan 42, Heverlee

January 12

- 14:00 h: German Andres Vasquez Nino
Towards two quantitative microbiological risk assessment (QMRA) scenarios for listeriosis associated with smoked fish products in the Belgian context
- 15:00 h: Bram Van de Poel
Ethylene biosynthesis system III during tomato ripening: revealed through systems biology.

January 26

- 14:00 h: Thomas Vandendriessche
Towards ultra fast strawberry aroma analysis
- 15:00 h: Jerry Ampofo-Asiama
Metabolomic flux analysis of tomato cells

February 9

- 14:00 h: Kim Buts
Browning in Braeburn apple: a proteomics approach to unravel the mystery
- 15:00 h: Darwish Hatoum
Browning in Braeburn apple : Effect of Breeding and CA conditions
