

ELT TECHNICAL COORDINATOR (928.MM.elt)

Company

Our client, ETRMA, the European Tyre and Rubber Manufacturers' Association (www.etrma.org), provides the tyre and rubber goods producers with the proper means to achieve the increasing challenges they face at European and global levels while anticipating further regulatory and market pressures.

ETRMA members are both corporations and national rubber manufacturers.

Function

To sustain its growth, ETRMA is currently looking for an ELT (End of Life Tyres) Technical Coordinator, who will be reporting to the Secretary General and who will coordinate the work of the 14 local management companies and be the link with the tyre industries.

This position requires experience, multicultural knowledge, commercial skills, flexibility and communication skills.

This is a full-time position, starting with a fixed 3-year contract.

Mission

- Representing the European technical viewpoints of the industry on ELT
- Coordinating and supporting the EU-ELT management companies Network technical activities
- Creating a European technical ELT-related database :
- ELT Recovery Technologies Database and cross-referral function
- Scientific/technical database (literature references, environment & health data concerning recovery operations) to facilitate answers supported by objective evidence to questions posed to ELTco from stakeholders
- Establishing a Technical database focusing on information relating to new tyre technologies and materials affecting ELT activities (tyre electronic sensors, rings, chemical ingredients, etc.)

Function

- Supporting, advising and coordinating about European Union regulatory compliance matters, such as REACH, Waste, Alternative energies related to ELT activities and products
- Involved in the feasibility study for new technical projects to be conducted by ELT companies
- Participating in CEN standardization meetings, and coordinating standards relating to ELT activities and products
- Supporting on communications: company support to communications policy and content, harmonizing national ELTco web-site presentation and information standards, peer-review activities, English translation and promotion of appropriate sharing of country-based experience and activities across Europe
- Representing the European technical viewpoints of the industry on ELT
- Representing and promoting the company's/ElTco joint activities at EU level, including information gathering on EU funds
- Representing ELTco, at their request, at international conferences and fairs

Profile

- Technical profile, market oriented (chemist, engineer, etc.)
- Industry : recycling, but also automotive or chemical industry
- Engineering background and openness (value approach, etc.)
- Experience in project management and team work
- Autonomy and leadership skills
- Coordination and networking ability in multicultural environments
- Fluency in English, any other European language an asset
- Ready to travel
